

Unique and versatile

are the possibilities of construction
with the Building Sets.

With this well thought out set it is possible for every youngster with imagination and creative ability to solve difficult problems in modern technique and architecture.

The characteristic flat square building principle of our times is made effective by gaily coloured building parts.

Technical details and interesting single projects do not hinder the young inventor in any way, and leave the widest scope for the little engineer. DUX-Universal, a teacher and friend of youth everywhere
