

Nom : ERECTOR (première époque) } The Mysto ERECTOR
 puis Gilbert ERECTOR

Période : 1914 - 1923

Pays : U.S.A.

Type : Meccanoïde compatible mais très différent de Meccano

Fabriqué par : Mysto Manufacturing Co. (1914-1916) puis A.C. Gilbert Co.

Diamètre des axes : 3,96 mm

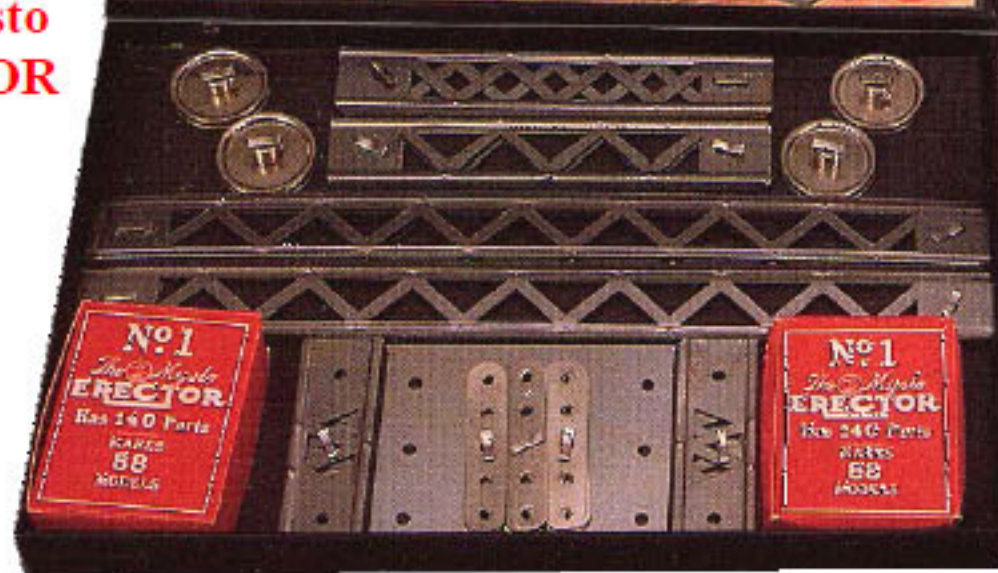

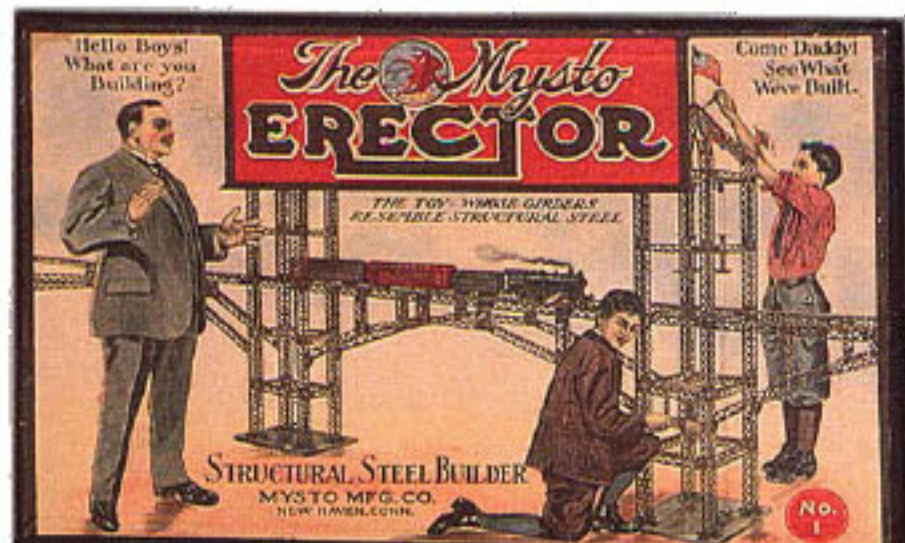

Espacement des trous : 12,7 mm

Boîtes disponibles : huit + «Electrical Set»(1917)

Différentes pièces : 60

Couleurs : tout nickelé puis nickelé, rouge et noir

Moteurs : deux moteurs électriques + variantes

The Mysto ERECTOR

ERECTOR SEPARATE MOTORS

<p>P. 52  50c</p> <p>No. P. 52-Erector Motor Retails for \$0.50.—This motor will operate very light models and requires a three-wire plug. It is not reversible. Do not expect too much of this motor. It is better to buy P. 53, 54, or 55. Don't let the price mislead you.</p>	<p>P. 53  \$1.00</p> <p>No. P. 53-Erector Motor Retails for \$1.00.—This is the same motor as P. 52 except that it does not reverse. It has two terminals, and cannot be made into a reversible motor. It is stronger, a more powerful, and will do the same work as P. 52. Also selling thousands of them in 1914 we can guarantee this motor to be unapproachable at the price. The base is 4 1/2 in. square and 3/16 in. in height over all.</p>	<p>P. 54  \$1.50</p> <p>No. P. 54-Erector Motor Retails for \$1.50.—This is a very strong motor with rubber brush holders with spring pressure—easily replaced. This is exactly the same motor as an ordinary motor. It is stronger, and will do the same work as P. 52, 53, or 54, but you will get one of these reversible motors, and be well paid for your money. The base is 4 1/2 in. square and 3/16 in. high over all. Metal finished.</p>	<p>P. 56  \$5.00</p> <p>No. P. 56-Erector Motor Retails at \$5.00.—This motor is not packed in any of the Erector sets. Boys will want to know more of its features. The base is 4 1/2 in. square and 3/16 in. high over all. It is reversible. DIRECT OR ALTERNATING CURRENT. The voltage required is 110. The base is 4 1/2 in. square, and the motor 3 1/2 in. high over all. It is well ventilated. Brushes adjust liberally. The terminals are connected to the base, and cord can be easily attached through the hole above. All parts are perfectly finished. Finished in black tones.</p>

Gilbert ERECTOR

1920

La pièce caractéristique d'ERECTOR est une poutrelle profilée d'environ un pouce de large. Au cours de cette période, une poutrelle plus étroite viendra s'ajouter à la précédente puis totalement la supplanter dans la période suivante.
