Home is not a place, it's a feeling.

### Content package

- Video Link**
- 1 x RJ45 LAN Network (ethernet) network kit (with 10 different color cables)
  - Electronic lock and sensor and door lock or dial
  - 2 x 1 mounting brackets
  - Adhesive (30x40x2) round head screws and adhesive with cover head
- Mounting wall**
- Professional (but simple) mounting guide (with video instructions) with number
  - Hand saw or hand sander (25 and 50 mm) with 200 and 100 grit paper
  - 2 x 6 with countersink for the video sensor
  - Video sensor kit (with optional built-in microphone) see available
  - 2 x 80 mm screws (20x25) with washers
  - 2 x 80 mm (with 20x25) with washers
  - 2 x 80 mm (with 20x25) with 2 points for individually attached frames

### Install your doorphone in 3 easy steps

1. Mark the location for the sensor (video gate) and the mounting (bracket) on the wall
2. Connect the door & video cable to lock, the sensor and button cable to power cable
3. Mount the sensor and video gate and the mounting bracket on the wall

Available in 2 variants
