# TRIX CONSTRUCTION

## SIX GRAND PRESENTATION SETS

### "POWER TRIX 116" Price 29/6

It's New! It's complete with Motor and Gears! It's **POWER TRIX**—the wonderful new Construction Set specially designed to build real Power Driven working models. Absolutely complete with 116 precision finished parts including a full set of gears and the powerful "Permag" electric motor—plus the 48-page Engineering Manual and the grand new fully illustrated "Motorised Models Manual."

### "ELEMENTRIX 99" Price 8/3

With this first Basic Set of 99 parts, dozens of interesting models can be built. It is complete with the fully illustrated 48-page

Abridged Engineering Manual, showing full constructional details of both simple and advanced models of all types.

### "TRICY TRIX 163" Price 24/6

Here's a new and easy way to learn the elements of magnetism and electricity—Bells, Buzzers, Relays, Motors and other electrical apparatus—The Tricy Trix Electrical Engineering Manual shows you how to build them all in 100 fully illustrated pages.

### "SENIOR TRIX 345" Price 39/9

"Senior" or "Junior," if you like building engineering models, then you will be delighted with this larger size Basic Set. There are 344 strong all-metal parts, plus the superb 116-page Complete Engineering Manual, simply packed with exciting working models.

### "MOTO TRIX 363" Price 56/-

A magnificent Presentation Set of 359 precision finished parts—complete with gears and angle girders, screwdriver and spanner—plus the famous "Permag" motor and the 116-page Complete Engineering Manual, showing easy step-by-step construction of all grades of models from the simple to the most advanced types.

### "SUPER TRIX 368" Price 75/-

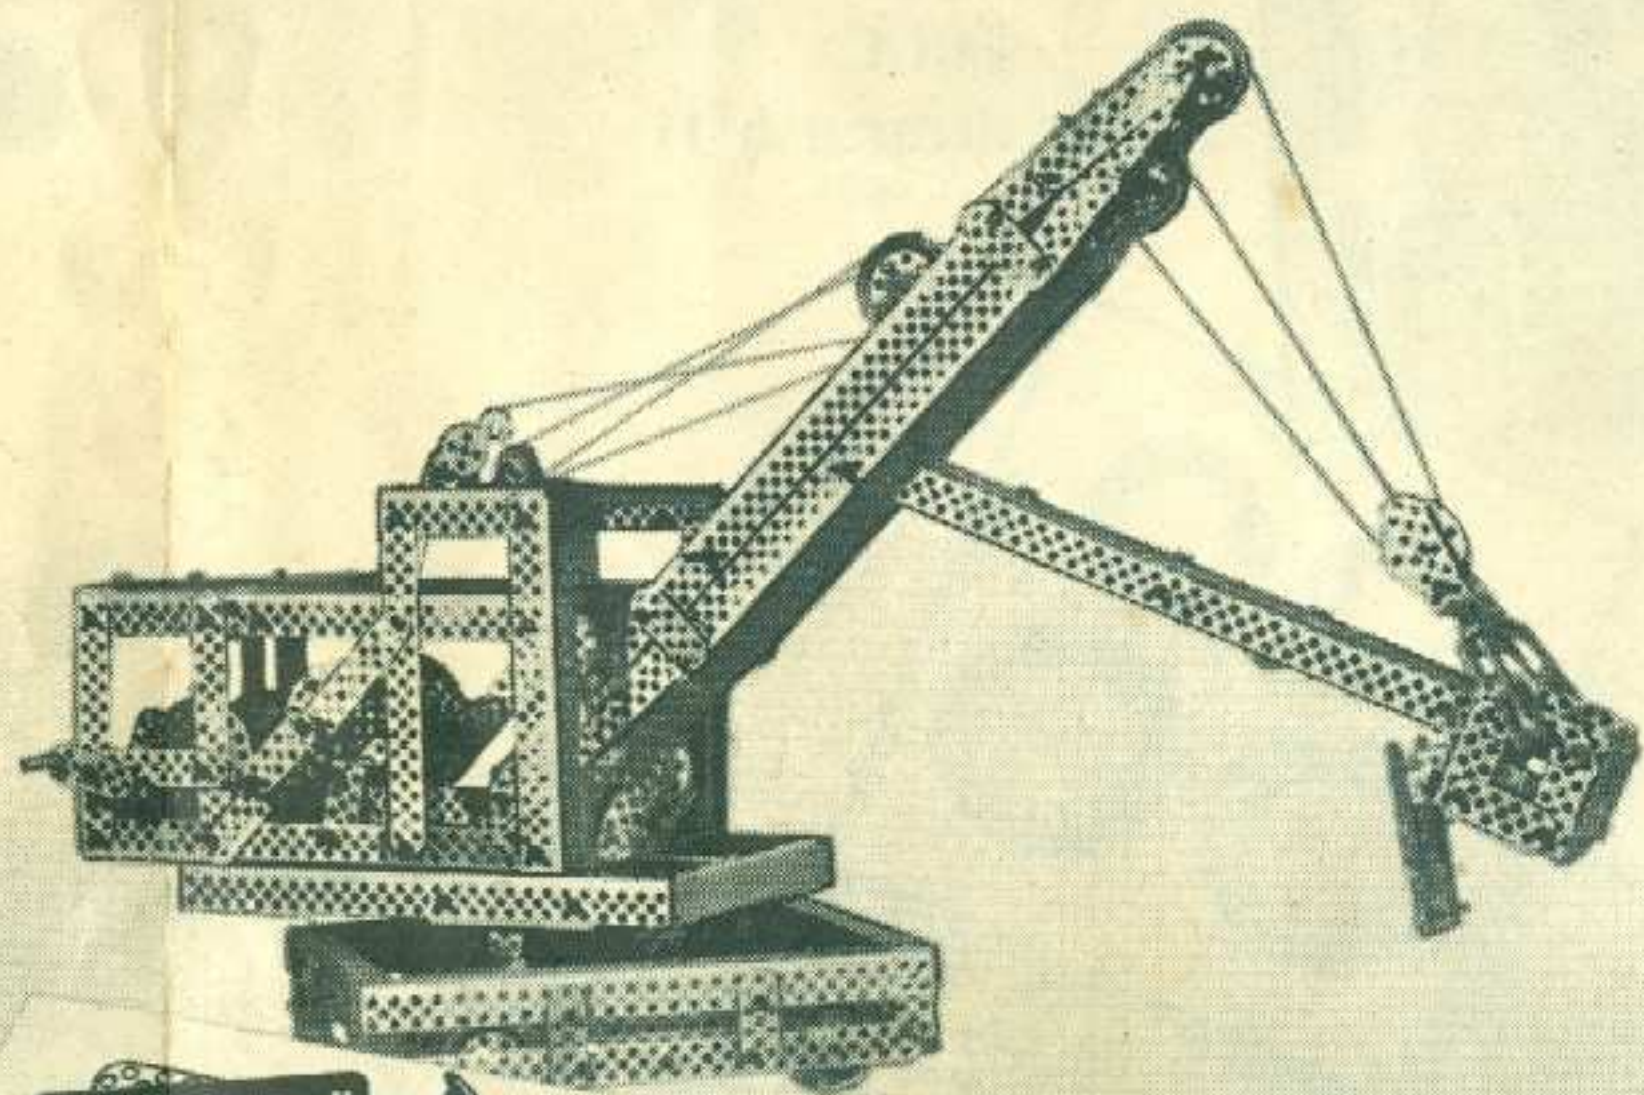

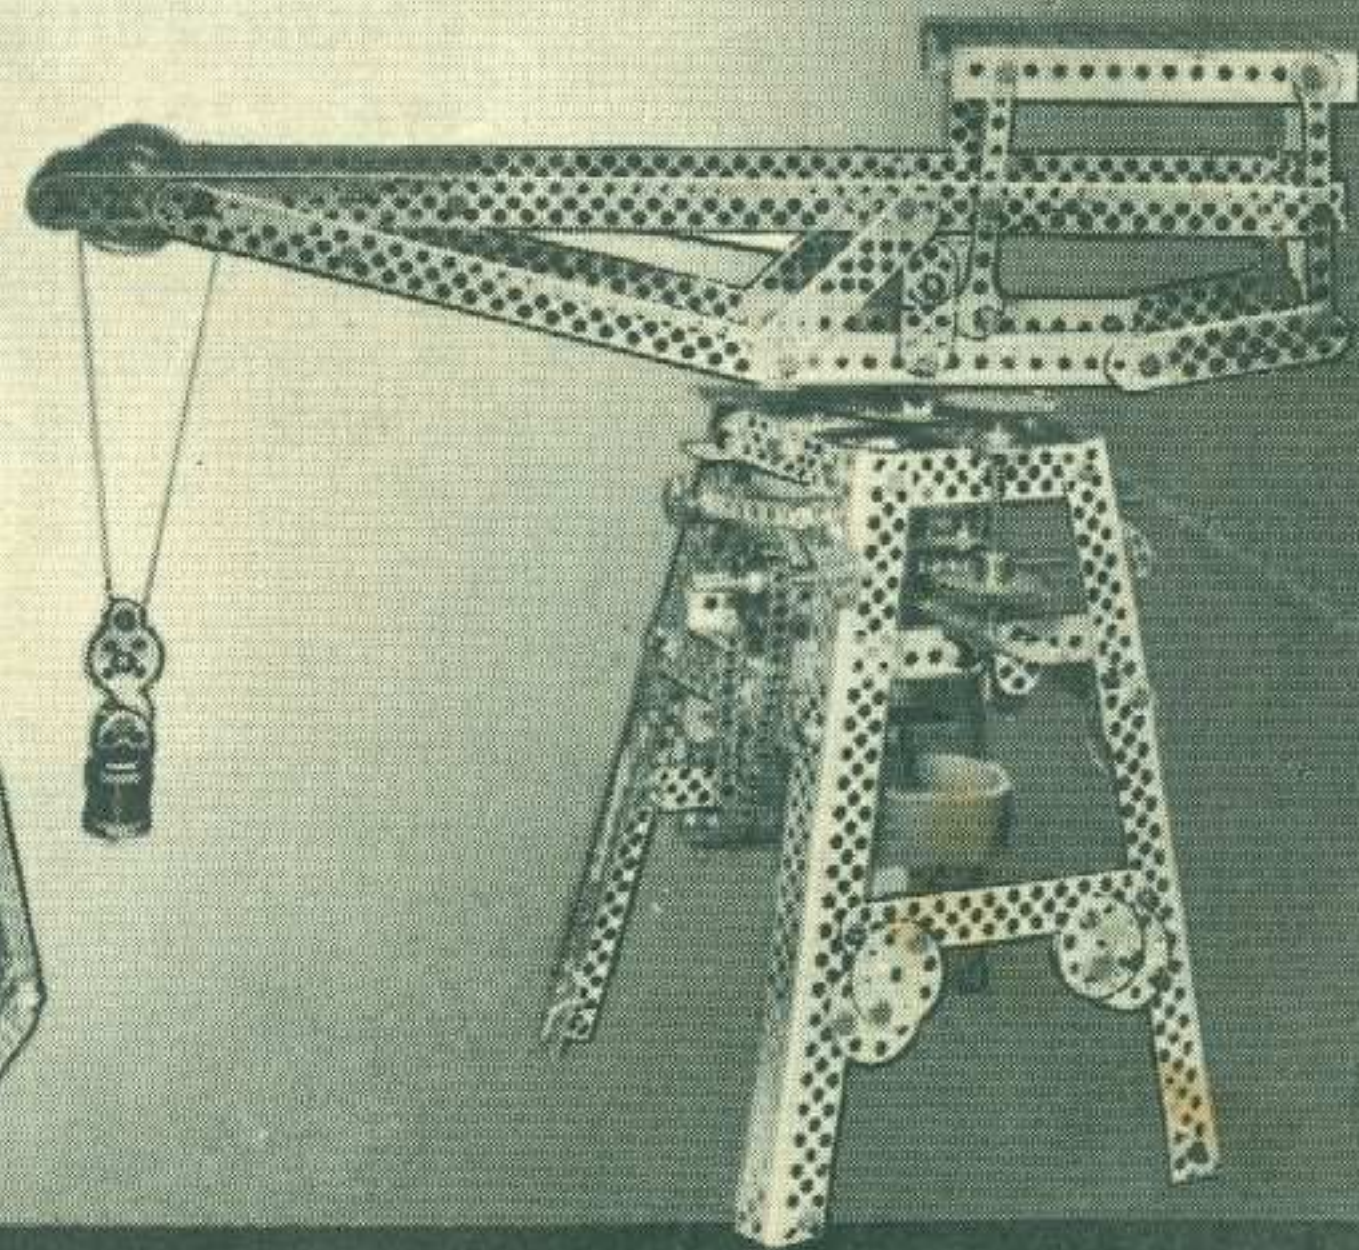

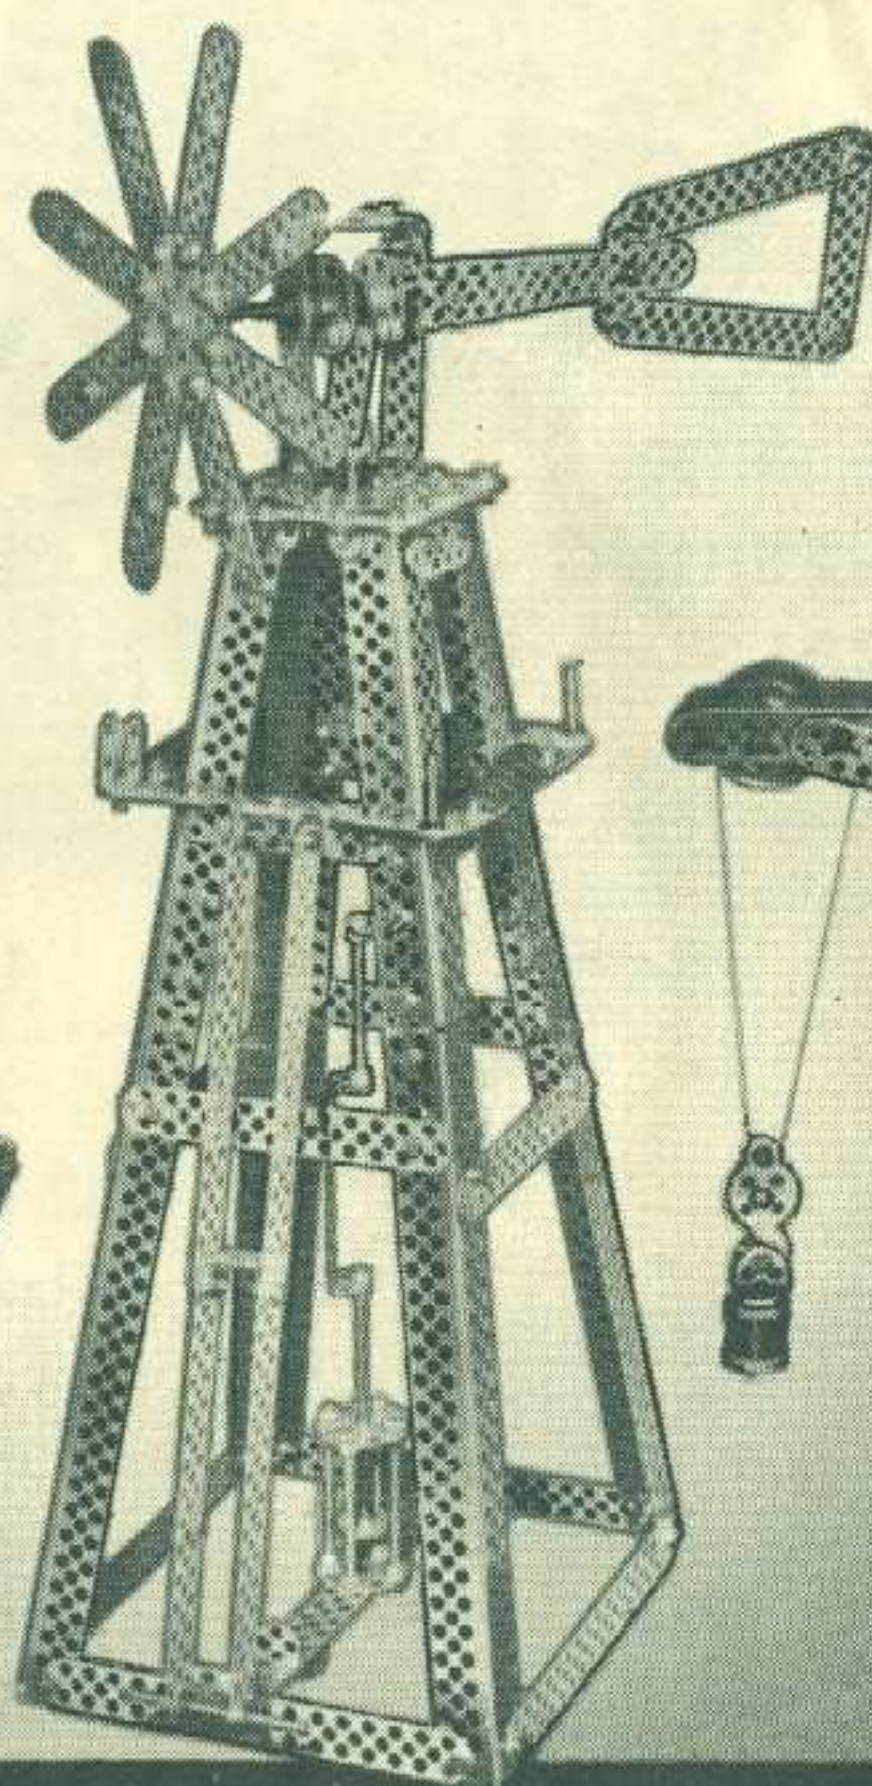

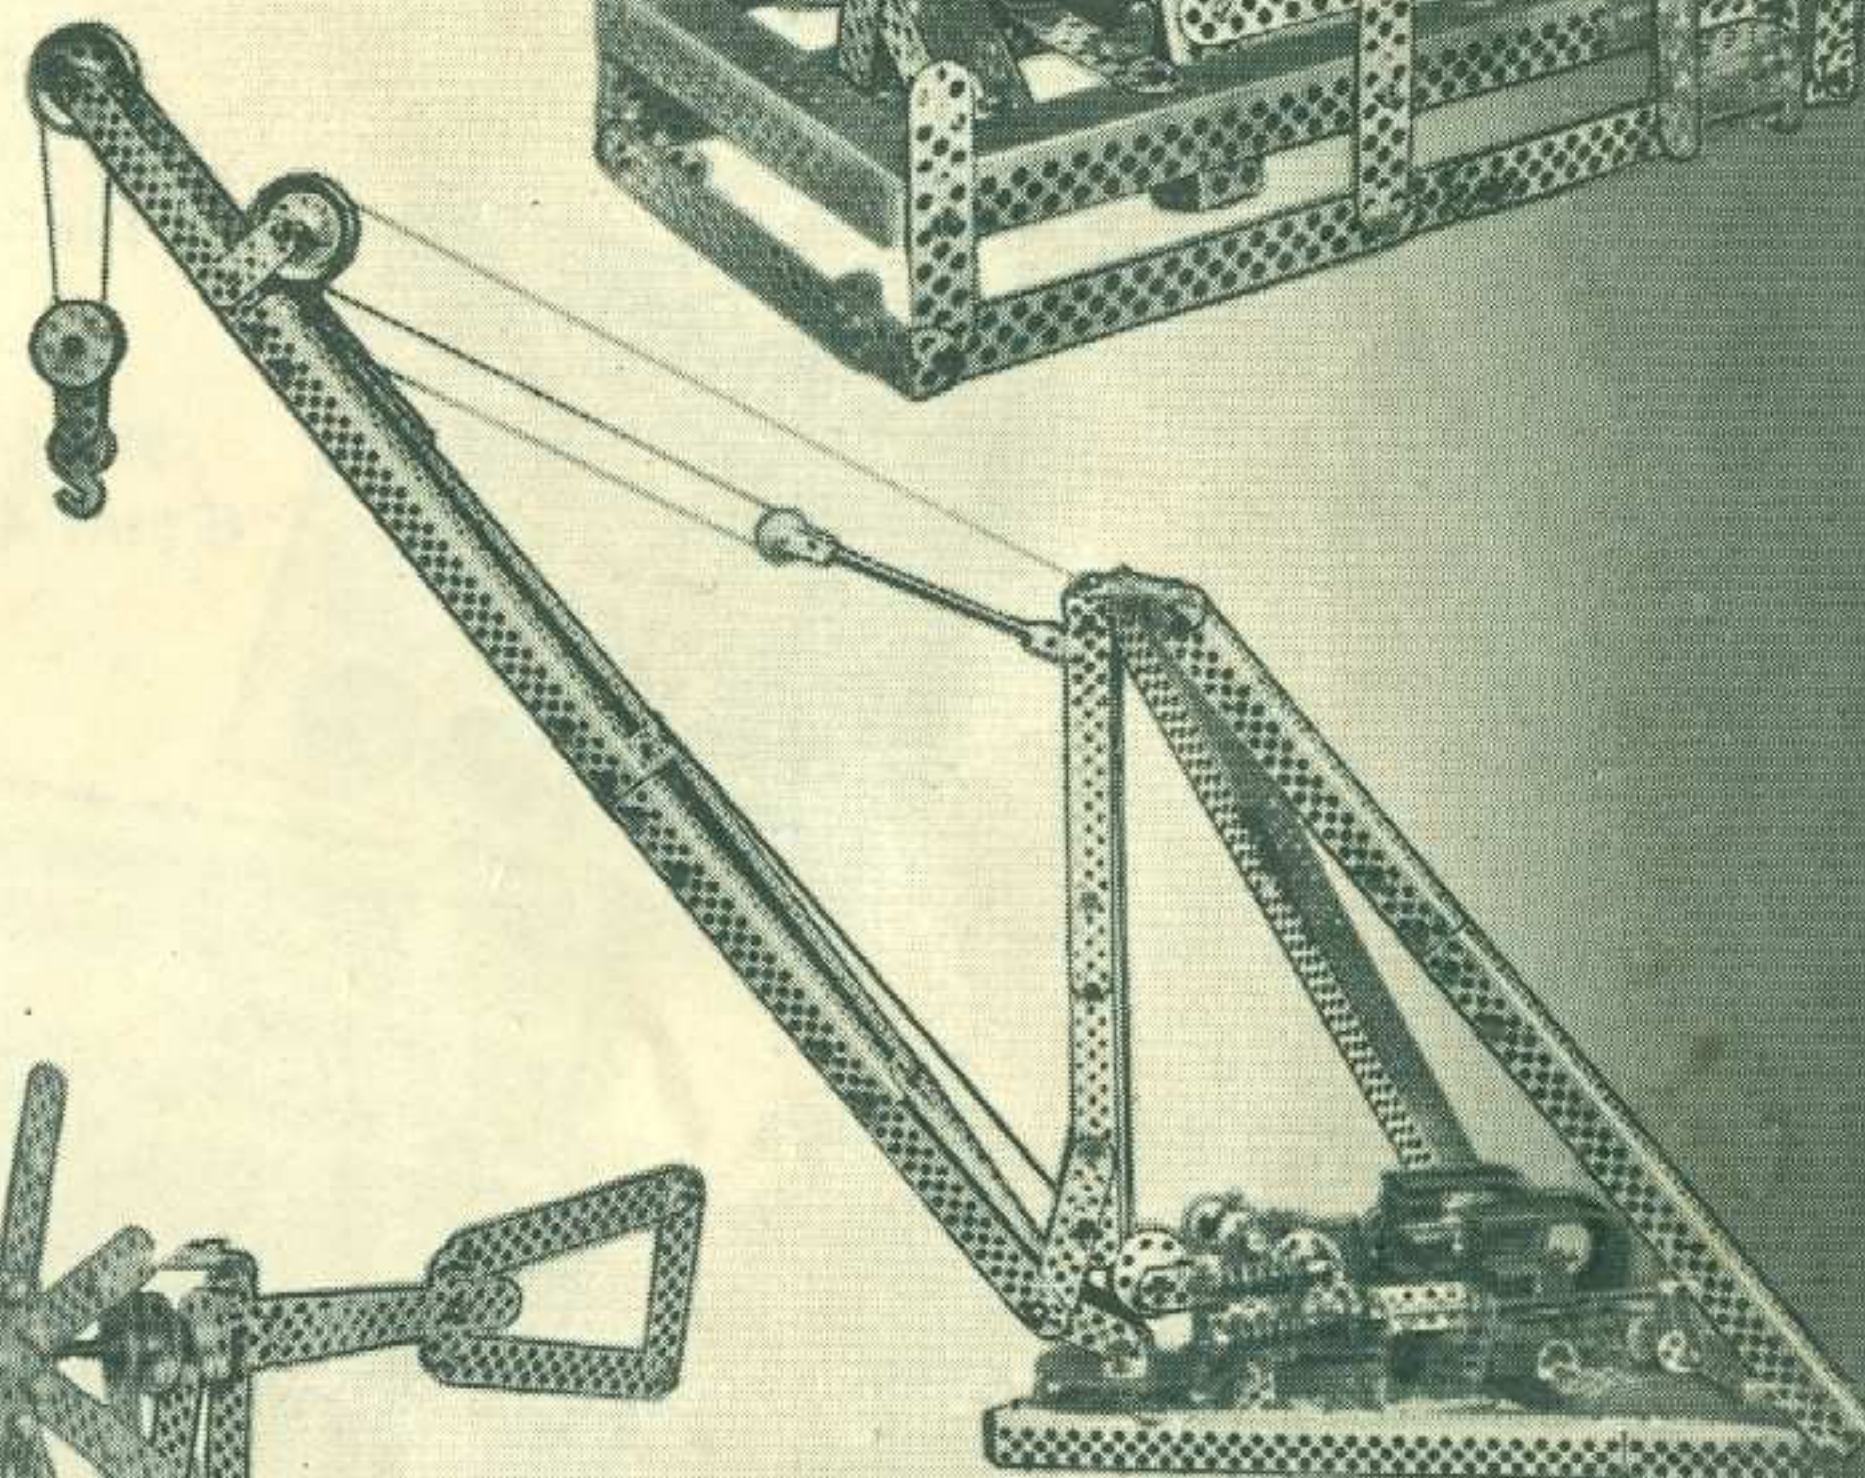

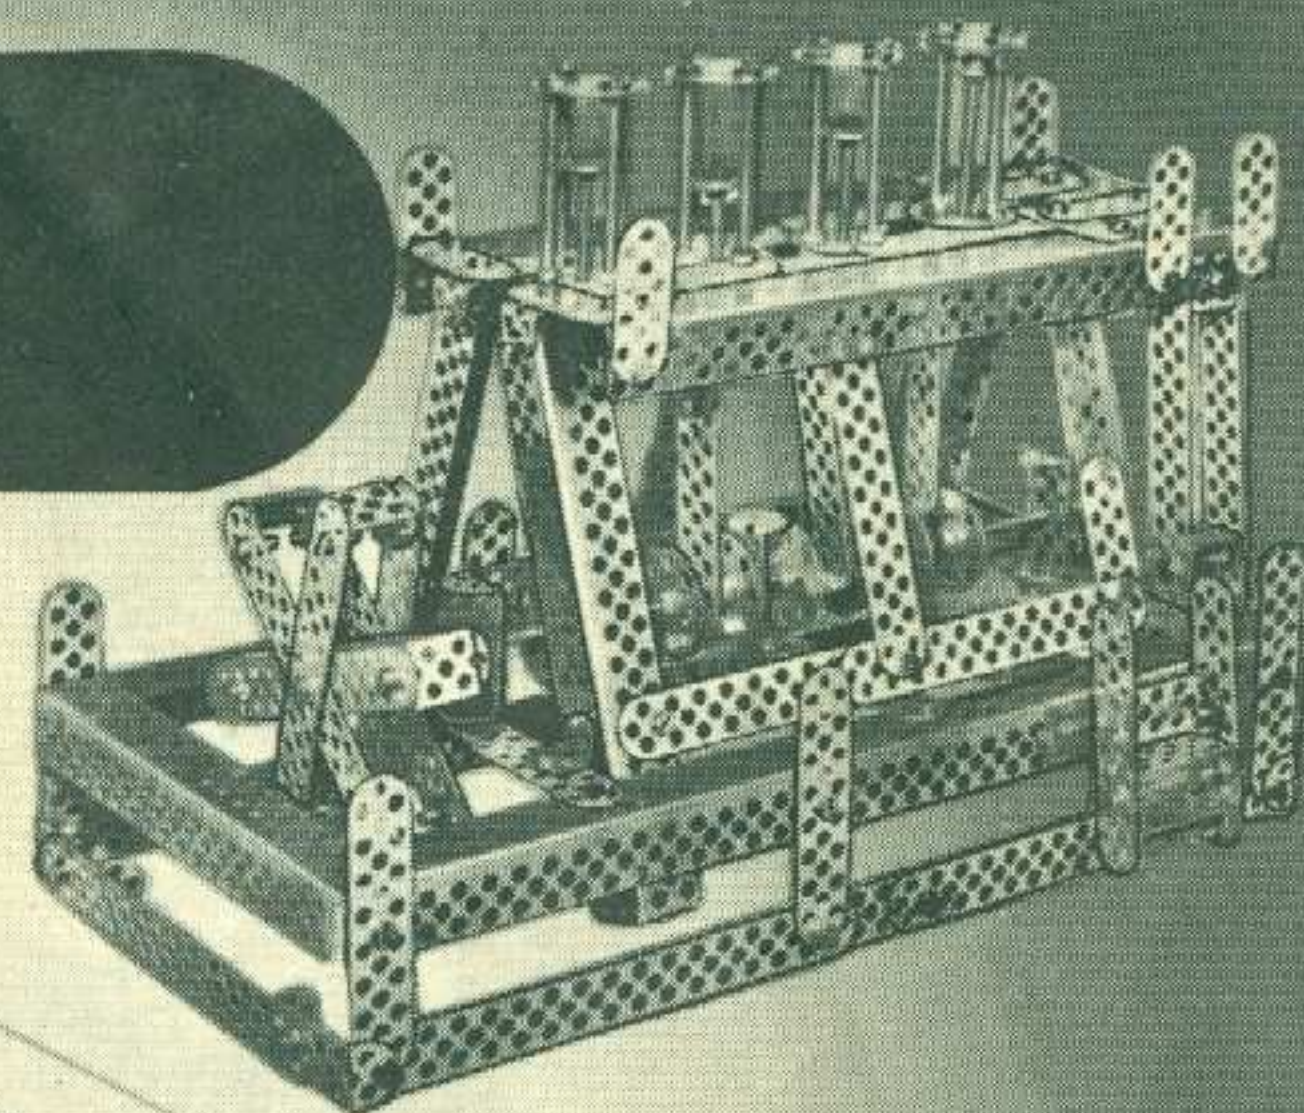

Absolutely complete, with ample supplies of the full range of TRIX parts, Super Trix enables you to build a vast range of power-driven working models. The 368 parts include gears, wheels and tyres, girders, the "Permag" electric motor and the 116-page Complete Engineering Manual, all superbly packed in a strongly constructed wooden work tray, specially designed to store and protect your Set.

# *with the* **TRIX UNIT SYSTEM** *you start with any set*

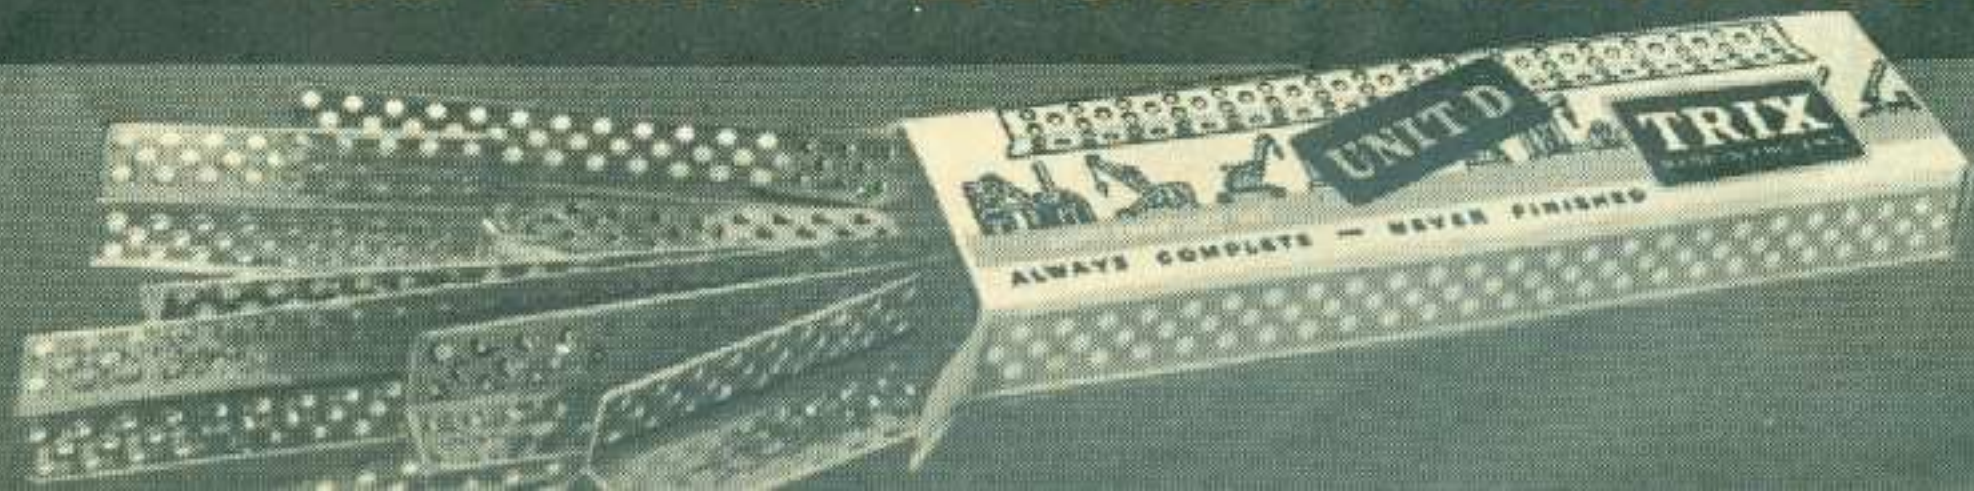

Yes! It's Child's Play with Trix Construction Sets, but Child's Play with a difference. Children never tire of the fascination of "putting things together"—of the very real thrill of building something on their own.

With Trix, you learn while you play, and who knows how many 'Engineers of Tomorrow' will master their first principles of engineering from the simple, concise instructions given with each of these most exciting working models. Every Basic Set is complete—yet you can always add extra Units to build bigger and more advanced models.

Trix Construction is unique—no complicated or expensive spares—versatile three-hole strips and girders—strong, precision finished all-metal parts, unpainted to allow for electrical contact—superbly illustrated Engineering Manuals with step-by-step instructions for a vast range of Real Engineering Models.
