STEEL CONSTRUCTIONAL SET

No. 1 Set

INSTRUCTION BOOK

VOGUE

STEEL CONSTRUCTIONAL SET

This manual even if it contained a hundred pages, could show only a small portion of the models it is possible to build with the contents of the Vogue Set. No attempt is therefore made to illustrate the hundreds of simple models upon which you can start to work without delay.

Porter's barrows, handcarts, swings, signals, scales, bridges, simple cranes and vehicles of all description; these and a hundred others will immediately suggest themselves to the fortunate possessor of a Vogue Set. Start with simple models, and you will quickly master the idea of using the special span driver, and how the various standard parts can be built into quite complicated working models.

SIMPLE INSTRUCTIONS

All Vogue parts are standard, and any two pieces can be bolted together with the standard sized nuts and screws supplied.

Do not tighten the nuts more than necessary to hold the pieces firmly, and you will then avoid damage to screw threads, and lengthen the life of your Set.

VOGUE CONSTRUCTIONAL SETS

NOW AVAILABLE IN THREE SIZES

No. 1, For Junior.

No. 2, Intermediate.

No. 3, Senior.

BELT DRIVES ON WORKING MODELS

These can be made with string, and the grooved pulley wheels in the Set. A reef knot is the best to use, as this knot will not slip. If you wish to reverse the drive, loop the string over the wheels making sure it crosses in the middle.

ILLUSTRATIONS

The models are all simple and easy to start with. Designed by our engineers upon proved mechanical principles, **any of them can be built with the contents of the Set as number shown on top of each page.** The illustrated models will doubtless give you other ideas for even more complicated designs, and you will find that it is by overcoming the problems of construction that you will derive your keenest enjoyment.

A successful model "**made out of your head**" is worth a dozen made out of this book.

EXTRA PARTS

To enable you to make larger and more complicated models, and to enable you to replace any lost or broken parts, special inexpensive Supplementary Spare Part Sets have now been produced, and may be obtained through any Vogue Set Dealer. Full particulars may be found on the inside back cover at the end of this book.

Vogue Steel Construction Sets

No. 1 SET (Junior)

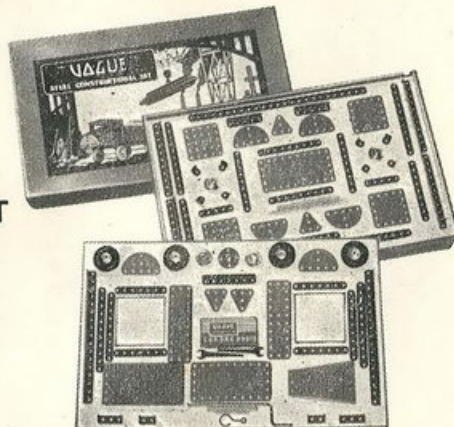

Part No.	CONTENTS. Description	Units
2	11 hole Flat Strip	- 4
5	5 hole Flat Strip	- 4
